

Ashley Morgan

Director, Sales Operations

Winston-Salem, NC | ashleyjanemillan@gmail.com | +1 786-205-0218 | linkedin.com/in/ashleyjmorgan

SUMMARY

As an innovative Revenue Operations leader with over 19 years in Sales Operations, not only do I run Forecast Calls, Executive MBRs/QBRs, Territory Planning and Quota Setting - I also implement systems that are adopted globally across my organizations. I was a prior radar Air Traffic Controller, and I bring that same mindset to my operational cadences. Poise under pressure, triaging what needs action first and keeping all the planes in the air.

EXPERIENCE

Director, Sales Operations | Cohesity | November 2021 to Present | Remote, NC

Scope

- **US Enterprise East:** Official Sales Operations lead for the region: weekly field briefings, forecast recommendations to the VP, account-ownership governance and district health scoring.
- **GM Americas organization:** Sales Operations lead for Commercial, Federal and LATAM: QBR and MBR materials for the CRO review, targets and Anaplan guardrails, LATAM risk reporting and trainings in Spanish.
- **Global:** Pipeline hygiene and forecast insights for the global sales organization: 143 dashboard builds across AMER, APJ and International on a daily refresh, plus operating cadences adopted by field teams worldwide.

Forecasting and forecast calls

- Own and run the weekly SVP-level forecast call; present on the weekly C-level call as a partner to the SVPs; join the District Manager calls as a leader and commentator (all since November 2021).
- Bring forecast recommendations to Sales VPs, for example raising the Low to match Closed plus Commit ahead of an MBR, and reset monthly calls within minutes of approval.
- Partner with Channel Operations, Order Management and Distribution at month and quarter end to remove obstacles and help opportunities close.

Pipeline hygiene and Field Management Dashboards

- Designed and run the Field Management Dashboards: 143 builds across Areas, Regions and Districts, refreshed daily, with AE-facing hygiene risk files, ClosePlan (MEDDPICC) views, deal bridges and slipped-deal tracking.
- Set the ClosePlan hygiene rules the field is measured by (Missing, Stale and Unfinished) and release weekly written briefings with diagnosis and direction for regional leaders.
- Forwarded by the CFO to Finance leaders as something to roll out to all Sales leaders and the critical DM layer; adoption has since spread by referral to Finance and Renewals.

Risk and analytics

- Built the AE Activity Tracker in Google Apps Script for about 305 AEs, combining CRM and forecast-system activity, travel and expense data and pipeline creation; in use for over two years and the basis of weekly updates to the CEO and CRO.
- Built an Ideal Customer Profile scoring model with Claude Code, calibrated by regression against four years of win and loss data; delivered to the CFO with progress reported to the board, saving more than

\$100K in quoted consulting fees.

- Built the global forecast risk dashboard used by all sales leaders, a LATAM red, yellow and green pipeline risk report that blends my own risk drivers with AI conversion analytics, and daily pipeline snapshots that show where each opportunity went.

Executive reporting

- Build the QBR and MBR materials the GM Americas presents to the CRO, including the written highlights, risks and talk track, validated with operations leads across three Areas.
- Identified light pipeline coverage in an MBR deck and ran an overnight pull-in and slipped-deal review whose results went into the CRO review the next day.
- Designed the district health score used in the Enterprise East VP's get-well plan and ran a same-day deal review requested by the CEO.

Planning, territories and quotas

- Lead territory and planning cycle design across about 70 districts and more than 300 AE territories, covering account and quota planning, segmentation and GTM strategy; Anaplan key user.
- Deliver targets to Area leaders with clear guardrails: District-level authority within Area roll-ups, Anaplan deadlines, and no AE communication before Finance approval.
- Advise leaders on quota relief and account-ownership changes, including renewal-quota impact.

Product design and systems

- Designed a working UI mockup and written specification for a new sales planning tool at the request of the global VP, Engineering and AI.
- Leadership approved a dedicated development workstation for my system-building work.

Enablement and leadership

- Primary trainer for field operations team members on planning and forecasting systems; onboard and mentor operations colleagues; deliver trainings in Spanish.
- Second-round interviewer for Sales Operations Manager hires.
- Peer enablement for Sales Operations teams in APJ and EMEA.

Manager, Revenue Operations | SPIDR Tech | Mar 2021 to Oct 2021

Founding Sales Operations hire reporting to the CRO: built the Salesforce instance from scratch, designed opportunity workflows with compliance and legal requirements, managed the BDR team and supported the company through its acquisition.

Manager, Sales Operations | IHS Markit | Nov 2019 to Mar 2021

Deal desk for Maritime and Trade across the US, Canada, LATAM and APAC: complex federal deals, pricing guidance, RFP and RFQ strategy; change management and enablement lead for the move from Microsoft CRM to Salesforce.

Manager, Renewals Sales Operations | Veritas Technologies | Apr 2019 to Nov 2019

SLED, Healthcare and Federal renewals operations, appliance quoting and quoting automation; trained the team on Excel and Office automation.

Air Traffic Controller | Federal Aviation Administration | Aug 2018 to Apr 2019

Completed radar training at the FAA Academy: real-time decision-making, high-stakes communication and analytical precision.

Senior Sales Operations Analyst | IHS Markit | Jul 2007 to Jul 2018

Eleven years from administrative assistant to senior sales operations: analytics, finance, global deal execution, international collections using multilingual skills, and contract redlines with Legal.

AWARDS

- **President's Club FY26.** Invited by Kit Beall, Chief Revenue Officer: "In recognition of your incredible contributions."
- **Pipeline Architect Award, Revenue Operations (FY26).** Named recipient in the Revenue Operations category.
- **Cross Functional MVP Award, Americas (FY26).** Selected by Americas leadership, including Ty Fagg, GM Americas.

SELECTED RECOGNITION

34 recognitions from 2022 to 2026, from C-level leaders to individual contributors across Sales, Finance, Operations, Engineering and Marketing.

"You guys should take a look at this - it is very good. Seems like something we should roll out to all Sales leaders and the critical DM layer; The metrics on this are very well thought and highly operationally oriented."

Eric Brown, Chief Financial Officer, 2026

"Ashley, I just want to send my compliments for how you prep, navigate, and follow up on these calls. You come across as completely unflappable and able to answer anything thrown your way. Thanks for your great support! Very impressed, Ken"

Ken Seitz, Global Vice President, MSP, 2026

"Huge shoutout to Ashley for going above and beyond to help support [our] account segmentation issues for territory planning! Thank you as always for being a great business partner!"

Ryan DuChene, SVP, Customer Lifecycle, 2025
